

Resume

Profile

I'm a creative and detail-oriented person, who is a team player, and likes the dynamic of a group where you can test your ideas, is accustomed to work in a fast-paced environment, and finds it very challenging, love to work that way. Have a keen interest in design, the web, social networks & usability, how people interacts with things and to create great user experiences.

I'm very interested in working in an innovative and creative workplace, where the tone is loose and the pace is high and motivation.

Portfolio

Below is a list of some of the major projects i have worked on.

Nordjyske Inside (iPad app)

An iPad Magazin app, where I was involved from the early concept development, which involved user research, where prototypes and concepts where presented for focus groups. The app was made, with all content created with HTML5/CSS3 and JavaScript, and was very involved in defining the navigation in the app. Other main focus, was to create a subscription process that was so simple as possible, since Apple InApp wasn't a possibility. Throughout the process I delivered Wireframes, [Prototypes](#) made in both Keynote and HTML.

www.dmogt.dk

This was mainly a pure production job, where based on the company's new strategy, which Involved some wireframe iteration, before customer where satisfied and then after design agency had made a design, I was the Front-end developer on the website.

www.port2010.dk

This was a website for a modern art festival in Aalborg, here I was involved in creating the concept for the site, where focus was on social medias, and how we could use the to both get people to use the website, but also to visit the different shows. It involved some wireframes, and again I worked as the Front-end developer on the site.

www.am3d.com

AM3D is a company the create 3D audio software, I was apart of the team, who had to design and develop a new site, one of the main things was to create a better navigation on the site, which analysing there analytics data. Based on this I made a [rapid prototype](#) to demonstrate site internal in the company, and it showed both a standard website and a mobil website, the mobil on never got made.
